

Water Clarity Tube

Reduced water clarity is a sign of reduced water quality

Clarity tube

A: Clear base for viewing the disk; **B:** Metered scale on the side of the tube; **C:** Black disk; **D & E:** Magnets for moving disk; **F:** Black stopper-cap for sealing the tube

Measures the clarity of a water sample, calibrated as a Measure of Total Suspended Solids (TSS)

Case Study: Shiyabazali Informal Settlement

Howick Waste Water Treatment Works discharge is monitored 3 times a day by citizen scientists to assess outflow & quality in terms of the Dept. of Water & Sanctions discharge limits
